

Writing on behalf of Jacksonville, Florida. Please do not block our Air1 signal. Air1 serves me as a local resident because it gives me the option to listen to music that is positive and does not contain the mainstream garbage that most local radio stations put on the air containing profanity, sexual language, references to drugs, alcohol, violence and negativity. Air 1 is family-friendly and supports positive and wholesome values and has an encouraging impact in our local community. This extremely important and of GREAT public interest. Please do not force me or anyone else in this country to be exposed to the filth and negative music that most local radio stations play. Air1 is a very important part of many citizen's positive values in America and we should have the right and ability, not restricted by government, to listen to positive radio.
